Name: Roberto Isaias
Title: Executive Vice President & Chief
Supply Chain Officer

Mattel, Inc.
Conflict Minerals Report
For the Year Ended December 31, 2019

This Conflict Minerals Report (the “Report”) for the year ended December 31, 2019 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”). As used in this Report, “3TGs” or “Conflict Minerals” means tin, tantalum, tungsten, and gold, and “Covered Countries” means the Democratic Republic of the Congo and adjoining countries. Throughout this Report, “Mattel” or the “Company” refers to Mattel, Inc. and/or one or more of its family of companies, as applicable.

I. Introduction

Products Covered by This Report

Pursuant to the Rule, Mattel undertook due diligence measures on the source and chain of custody of the necessary Conflict Minerals in the products it manufactured or contracted to be manufactured for the period covered by this Report that the Company had reason to believe may have originated in the Covered Countries and may not have come from recycled or scrap sources. For the period covered by this Report, these are products in the following categories:

- Dolls, which includes brands such as *Barbie*, *American Girl*, *Enchantimals*, and *Polly Pocket*.
- Infant/Toddler/Preschool, which includes brands such as *Fisher-Price* and *Thomas & Friends*, *Power Wheels*, *Fireman Sam*, and *Shimmer and Shine (Nickelodeon)*.
- Vehicles, which includes brands such as *Hot Wheels*, *Matchbox*, *CARS (Disney Pixar)*, and *Jurassic World (NBCUniversal)*.
- Action Figures/Building Sets/Games, which includes brands such as *MEGA*, *UNO*, *Toy Story (Disney Pixar)*, *Jurassic World (NBCUniversal)*, and *WWE*.

Reasonable Country of Origin Inquiry

Mattel conducted in good faith a reasonable country of origin inquiry (the “RCOI”) regarding the necessary Conflict Minerals used in the Company’s products. The RCOI was reasonably designed to determine whether any of the necessary Conflict Minerals used in the Company’s products originated in the Covered Countries and whether any of these Conflict Minerals may be from recycled or scrap sources. Based on the RCOI, Mattel was unable to determine that such Conflict Minerals did not originate from the Covered Countries or are not from recycled or scrap sources and, as a result, the Company conducted additional due diligence on the source and chain of custody of such Conflict Minerals.

II. Due Diligence

The design of Mattel’s Conflict Minerals program is intended to conform, in all material respects, to the Organisation for Economic Co-operation and Development’s (the “OECD”) Due

Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and related Supplements on Tin, Tantalum and Tungsten and on Gold (the “OECD Guidance”). In accordance with the OECD Guidance, Mattel took the following measures as part of its due diligence process:

Step One: Establish Strong Company Management Systems

Mattel has adopted a public Conflict Minerals Position Statement, which sets forth, among other things, its policy of supporting responsible sourcing of 3TGs, its approach to supplier engagement, and its policies for addressing identified supply chain risks. The complete Conflict Minerals Position Statement is publicly available at <http://corporate.mattel.com/about-us/MattelsCommitmentToResponsibleSourcing-2013.pdf>. The Company makes available to its employees a confidential hotline that allows employees to report violations of Mattel’s policies or illegal or unethical behavior, including violations pertaining to the Conflict Minerals Position Statement.

A cross-functional team of representatives from various departments of the Company, including Global Procurement, Global Quality and Regulatory Compliance, Information Technology, Finance, and Legal, supports the Company’s commitment to ethical sourcing of 3TGs and compliance with Mattel’s Conflict Minerals Position Statement and applicable laws.

Mattel also engaged an independent third-party consultant (“the Consultant”), to assist with the Company’s 2019 RCOI and the implementation of a supply chain due diligence plan using tools developed by the Consultant as well as the Responsible Mineral Initiative’s (“RMI”) Conflict Minerals Reporting Template (the “Template”). The Consultant also provided training for members of Mattel’s Conflict Minerals cross-functional team.

Mattel is a downstream consumer of 3TGs and does not purchase raw minerals directly from any mines, smelters, or refiners or any of the Covered Countries. In furtherance of Mattel’s long-standing commitment to ethical sourcing and compliance with national and international laws, Mattel has actively engaged its suppliers and asked for their cooperation in conducting the necessary due diligence related to Conflict Minerals. Mattel’s position on Conflict Minerals has been communicated throughout its supply chain.

Step Two: Identify and Assess Risks in the Supply Chain

With the assistance of the Consultant, Mattel identified and assessed risks in its supply chain by identifying “at-risk” suppliers that may provide Mattel with necessary Conflict Minerals, surveying such “at-risk” suppliers using the Template, and reviewing the responses provided by such suppliers.

Mattel identified suppliers that provide the Company with components that contain 3TGs and/or electronic parts as “at-risk” suppliers. The resulting list contained 50 such “at-risk” suppliers. The Company then surveyed the 50 “at-risk” suppliers using the Template to collect information regarding the presence and sourcing of 3TGs used in the products supplied to the Company. Following the initial request to complete the Template, reminder emails were sent to each non-

responsive supplier requesting completion and return of the Template. The information provided by the suppliers in response to the Template was collected and stored using an online platform provided by the Consultant. In addition, suppliers who had conducted their own RCOI through the use of the Template were asked to provide their completed reports to Mattel.

The Consultant assessed the information received from the suppliers. This assessment included a review of the information provided by suppliers for completion, consistency, plausibility, and conformity to the expectations established in Mattel's Conflict Minerals Position Statement. The Consultant also compared the lists of smelters and refiners provided by suppliers against the list of known 3TG processing facilities worldwide published by the Department of Commerce, as well as the lists of compliant smelters and refiners published by RMI's Responsible Minerals Assurance Process, the London Bullion Market Association Good Delivery program, and the Responsible Jewellery Council Chain-of-Custody Certification program.

If a smelter or refiner was not certified through the use of these lists, the Consultant attempted to contact the smelter or refiner up to three times to gain more information concerning its sourcing practices and whether it utilized internal due diligence procedures or other processes to track the chain-of-custody from the source of its mineral ores. The Consultant also conducted internet research to locate outside sources of information regarding the smelter or refiner's sourcing practices.

Step Three: Design and Implement a Strategy to Respond to Identified Risks

If Mattel becomes aware of a supplier whose supply chain includes 3TGs that are not conflict-free, the Company will take appropriate actions to remedy the situation in a timely manner. These actions could include reassessment of the supplier relationship, including but not limited to, discontinuance of purchasing any products from such supplier and/or terminating supplier agreements with such supplier. Mattel advises suppliers to take similar measures with their own sub-suppliers to ensure alignment and traceability throughout the supply chain and back to the smelter.

Step Four: Support the Development and Implementation of Independent Third-Party Audits

As discussed above, Mattel does not have direct relationships with smelters or refiners, and it does not perform direct audits of these entities' supply chains for Conflict Minerals. Mattel supports multi-stakeholder efforts and industry-wide collaboration focused on procuring conflict-free minerals, including the development and implementation of independent third-party audits of smelters' and refiners' sourcing by such stakeholders.

Step Five: Report on Supply Chain Due Diligence

As indicated in the Form SD, this Report is publicly available at <http://corporate.mattel.com/about-us/2019MattelConflictMineralsReport.pdf>. Mattel's Conflict Minerals Position Statement is also publicly available at <http://corporate.mattel.com/about-us/MattelsCommitmentToResponsibleSourcing-2013.pdf>.

III. Due Diligence Results

For the period covered by this Report, based on the due diligence measures described in this Report, Mattel does not have conclusive information regarding conflict status, the country of origin of, or facilities used to process, the necessary Conflict Minerals in the Company's products. Mattel's efforts to determine the mine or location of origin of the necessary Conflict Minerals in the products covered by this Report with the greatest possible specificity consisted of the due diligence measures described in this Report. Attachment A to this Report includes lists of the facilities that the surveyed suppliers reported as being in their supply chains, along with the corresponding metal processed at a particular facility, the processed metal's country of origin and the particular facility's independent third-party audit certification status.

IV. Future Steps to Mitigate Risk

Mattel will continue its efforts to improve its due diligence to further mitigate the risk that the necessary Conflict Minerals in its products could benefit armed groups in the Covered Countries by:

- Further engaging with suppliers that provided incomplete or uncertain information or did not respond to the supplier survey;
- Encouraging suppliers to use certified compliant sources of Conflict Minerals, or engaging with suppliers believed to be supplying Conflict Minerals from sources that may support conflict in a Covered Country to establish an alternative source of Conflict Minerals;
- Continuing supplier consolidation efforts with the aim to reduce the number of our current suppliers in order to make our supply chain more transparent and easier to conduct due diligence on;
- Providing training and clear communications to suppliers to help clearly identify chain of custody and explanation of the Template to insure supplier's ability to complete their input accurately; and
- Periodically reviewing, and updating as necessary, Mattel's Conflict Minerals Position Statement.

ATTACHMENT A

For each of the lists below, smelters and refiners marked “*” have been certified as compliant with an independent third-party audit program.

The following is a list of the smelters and refiners reported by Mattel’s suppliers as being in their supply chain with indications of Covered Country sourcing or unknown sourcing:

<u>Metal</u>	<u>Smelter/Refiner</u>	<u>Mine Countries of Origin</u>
Gold	Almalyk Mining and Metallurgical Complex* (AMMC)	DRC- Congo (Kinshasa), Zambia
